I combine these so your total cost at the bottom is reflective of the number of tons, gallons, drums etc. shipped. I wouldn't think you would want a sheet like this per manifest. I am thinking it would be cleaner to keep this as is and attach a second excel spreadsheet that breaks out cost per manifest. What do you think about that?

Do you do these per manifest? Or do you combine?

It would be nice if we had a waste spreadsheet like we have now tracking the waste disposed and include this information in the spreadsheet by manifest but also include the surcharges separately. We would probably have to do both the Off-Site report and include this as a backup to the off-site report.

What would it take to do something like this? I would have to talk with JoAnn to see if we could ask you guys to do this.

Thanks
